

RectorSeal[®] Root Destroyer

DESCRIPTION:

RectorSeal[®] Root Destroyer is formulated to destroy and control the growth of roots which enter sewer systems through the pipe joints or cracks. When applied as directed, it is absorbed only by the roots it comes in contact with in the pipes. It attacks and dissolves blockages causing these roots to wither away thus allowing sewage to flow freely through the system.

CHARACTERISTICS:

- Fast acting at dissolving roots and fungi that block sewer pipes
- Will not harm tree or shrub roots except where they entered pipes
- No need for mechanical devices or harsh chemicals that may damage pipe
- Child resistant container cap - safer to store
- Optimum crystal size - more product gets to blockage and stays longer
- EPA registered product (EPA Reg. No. 1278-5-51219)

APPLICATIONS:

RectorSeal[®] Root Destroyer can be used with all types of pipe and sewer construction. RectorSeal[®] Root Destroyer is NOT designed to open clogged systems that have been stopped up with hair, grease, coffee grounds or other organic matter other than roots.

INSTRUCTIONS:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Wear eye goggles or face shield when handling.
2. Do not apply through tub or sink drains. Apply through clean-out plug or distribution box of drain field if possible. Add total contents of package. Add water to carry crystals to blockage.
3. If clean-out plug or distribution box is not available, pour 1/3 of contents into toilet and flush. Repeat until entire contents has been flushed down.
4. If blockage persists, add additional ROOT DESTROYER. Make sure crystals get to the point of blockage.
5. Repeat every 6 months to prevent further root entry.
