

Rain PVC Manifolds

Rain's PVC Manifold System Makes Installation a Breeze

The patented Rain Manifold System allows for easy installation of solenoid valves and during valve box maintenance allows for quick removal of the solenoid valve.

Installation of these irrigation components does not require teflon on the male threaded parts due to the O-ring seal located in the female threaded part.

Components

Made from PN12 PVC.

Floating nut for easy assembly.

BSP threading.

Mainifold options with 2, 3 or 4 ports.

Fitting range include tees, nipples, caps, elbows, adaptors and couplings.
